

Columbia Forest Products

Is pleased to offer you an

AIA Approved Lunch and Learn Presentation (1 LU)

Qualifies For Health Safety and Welfare (HSW)

Hosted by:

Jere McCorkle: Specifications Representative, Hardwoods Incorporated

Program Title: Decorative Hardwood Plywood & Interior Air Quality

Our goal is to provide the best possible information available to the designer, architect or specifier about decorative hardwood plywood. The design professional will gain an understanding of composite core adhesive options with formaldehyde emissions as a focus. Formaldehyde will also be viewed through two different perspectives (LEED- based and emissions-based). The application examples will help to demonstrate the performance features of decorative hardwood plywood and the features and options available.

Columbia Forest Products is North America's largest manufacturer of hardwood plywood and hardwood veneer. Columbia's decorative interior veneers and panels can be found virtually everywhere you look – in high-end cabinetry, fine furniture, architectural woodwork, commercial store fixtures, residential construction and remodeling projects.

For additional information about Columbia Forest Products or to view the Columbia Forest Products product line, visit www.columbiaforestproducts.com.

To find out more about our "Lunch and Learn" events, or to make arrangements to attend our next "Lunch and Learn," please contact the following architectural specialists at Hardwoods Incorporated at 800-964-7804 or 404-792-0910.
