

And

Hardwoods Incorporated of Atlanta

Is pleased to offer you an

AIA Approved Lunch and Learn Presentation (2 LU)

Hosted by:

Jere McCorkle: Specifications Representative
Mike DiGiuro: Flexible Materials Incorporated

Program Title: AWI Modules – Veneer Solutions & Panel Product Standards

Our goal is to provide the best possible information available to the designer, architect or specifier about decorative hardwood plywood. The design professional will gain an understanding of the various veneer and plywood options available, the elements that add design enhancements, and those elements that could add cost to projects.

A discussion of LEED compliant products will be included. The application examples will help to demonstrate the performance features of decorative hardwood plywood and the features and options available.

Flexible Materials is a custom plywood manufacturer based in Jeffersonville, IN, and has been in business since 1929. Flexible Materials works with Hardwoods Incorporated to provide a wide range of veneer and plywood products.

For additional information about Flexible Materials, or to view their product line, visit the Flexible Materials Web site at www.flexwood.com.

To find out more or to make arrangements to attend a "Lunch and Learn" event, please contact the following architectural specialists at Hardwoods Incorporated at 800-964-7804 or 404-792-0910.
