Clarksville, TN Drying Yard

Specializing in African and South American Hardwoods

Ready When You Are

AHC Import Lumber offers imported hardwood to customers throughout North America via our sales offices in the Southeastern United States. We also sell to customers around the world direct from the source. Imported lumber is available in select and better grades in random widths and lengths. Additionally, we offer domestic hardwood lumber from our sister yards in truckload quantities or in LTL unit bundles. Logistical flexibility is an important part of how we create value for our customers. Our ability to combine both domestic hardwoods and imported species from a single source, along with our machining services, provides added value for our customers. Our extensive selection of species and superior service allows us to be responsive in meeting your needs. Before you make your next purchase, please call us for a quote, whether you require a single pack or a full truckload.

Value-Added Services

We offer the following machining services:

- S2S or S4S planed lumber
- Straight-line edged lumber
- Ripped-to-width, hit-and-miss moulder blanks
- Mouldings and sanded S4S

Quality Control

We put more than 60 years of experience to work for you to ensure that the hardwood lumber you receive is always the very best. We procure our hardwoods from only the best overseas suppliers. With four concentration yards, we have more than two million board-feet of kiln capacity. We control the drying environment to maximize lumber quality. When our premium hardwoods are purchased green, they are air-dried under covered sheds to guarantee flat, bright lumber. Meticulous grading before and after kiln drying, double end-trimmed lumber and computerized tallies demonstrate our commitment to quality control. In addition, all of our plants have covered loading facilities to assure that you receive dry lumber, even during adverse weather conditions. Computerized kiln controls, variable-speed fans, equalizing and conditioning ensure a consistent, high-quality product.

Technology + People

As an industry leader, we continually upgrade our equipment and expand our capabilities. We invest in advance technology operated by highly trained personnel. Our cutting-edge technology allows us to sort lumber efficiently by grade, width and length.

*AHC Import Lumber is a division of AHC Hardwood Group
with operations throughout the Appalachian region.*

Premium Hardwoods – Abundant. Renewable. Sustainable.

We care about the forests of the world. As industry leaders, we fully support responsible forest management practices that promote sustainability and result in long-term environmental and economic benefits.

We source forest products from mills that ascribe to a variety of certification programs, including the Forest Stewardship Council® (FSC®), Sustainable Forest Initiative (SFI), American Tree Farmer and Programme for the Endorsement of Forest Certification (PEFC). As additional credible certification programs are developed, we will continue to evaluate and expand our offering of certified forest products. Regarding imported hardwoods and veneers, we actively support and abide by the principles of the Convention in International Trade with Endangered Species (CITES) and the Lacey Act passed by the U.S. Congress, which protects against illegal logging. Please talk with your sales representative about your certified lumber requirements.
