

Cypress

Cypress is a durable and attractive wood product ideally suited for exterior projects such as siding, shutters, shingles, trim, fencing and posts.

Besides the natural durability for exterior applications, its natural attractiveness as well as quality staining and painting properties makes it an ideal choice for interior projects.

A distinct advantage that cypress has is its natural oil, "cypressene". The oil, combined with the natural tidewater environment that it is harvested from, provides resistance to decay, humidity and insects. Because of these natural qualities, there is no chemical treatment necessary, making cypress a safer, more environmentally friendly wood.

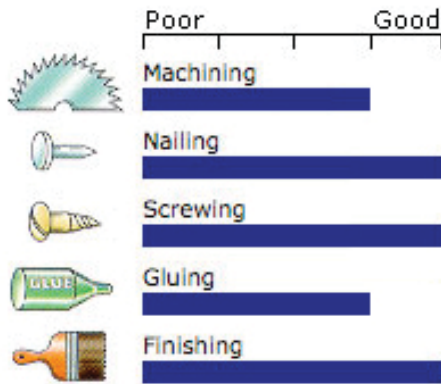

A lasting, durable solution...

Technical Specifications

Why use CYPRESS?

- **Natural Oil "Cypressene"** provides resistance to insects and decay - no chemical treatment needed
- **Available** in 4/4, 5/4, and 8/4 thickness
- **Attractive** in the natural state but also retains paint well and stains beautifully
- **Machines** well, planes easily and resists warping
- **Kiln Dried** at state-of-the-art facility and machined in-house
